

FURACOIN

L I G H T W H I T E P A P E R

Bringing transparency, pricing intelligence,
and data infrastructure to the
global emerald market through the
Emerald Report ecosystem.

BLOCKCHAIN: **ETHEREUM**

STANDARD: **ERC-20**

SUPPLY: **300,000,000 FURA**

01 — THE PROBLEM

A Market Without Transparency

The emerald market remains one of the most fragmented, opaque, and inconsistent asset classes in the world. Unlike gold, diamonds, or financial instruments, emeralds lack a unified reference system for valuation and pricing.

- No global pricing benchmark exists for emeralds
- Limited access to reliable and consistent valuation data
- Lack of standardized reporting across the industry
- Significant information asymmetry between buyers and sellers

02 — THE SOLUTION

The Emerald Report

The Emerald Report is designed as a pricing intelligence and valuation platform — a structured data layer for the global emerald market.

INITIAL PHASE (MVP)

- Instrument to measure emerald value
- Supports professional valuation (tasación)
- Tracks price behavior and market trends

FUTURE EXPANSION

- Global emerald pricing database
- Emerald Price Index (EPI)
- Advanced analytics and market intelligence
- Institutional-grade reporting

03 — TOKEN UTILITY

FURA is the Access Key

FURA is a 100% utility token with direct functional use inside the Emerald Report ecosystem. It is not speculative — it is the gateway to structured market intelligence.

REPORT ACCESS

FURA is required to unlock premium emerald market reports and intelligence data.

15% DISCOUNT VS FIAT

Token holders receive a 15% discount on all Emerald Report services compared to fiat payments.

MEMBERSHIP ACCESS

Includes semi-annual membership for continuous access to pricing data and analytics.

FUTURE PREMIUM FEATURES

Premium data access, advanced analytics tools, and institutional research capabilities.

AVAILABLE AT EMERALDREPORT.COM | FURACOIN.IO

04 — EVOLUTION

From Asset to Data Infrastructure

FuraCoin originally operated as a backed token linked to emerald value. The model has evolved into a pure utility token, repositioning FURA as a **data utility layer** — not a commodity representation.

PREVIOUS MODEL

Asset-Backed
Concept

CURRENT MODEL

Information-Driven
Ecosystem

05 — MARKET POTENTIAL

The Bloomberg of Emeralds

The Emerald Report has the potential to become the first globally recognized data authority in the emerald industry — similar to how established benchmarks serve financial and commodity markets.

POTENTIAL AT SCALE

- A Bloomberg-style platform for emeralds
- A global pricing reference system (EPI)
- A trusted data authority for the gemstone industry
- Standardize valuation across regions
- Improve overall market efficiency
- Enable institutional participation

06 — TOKENOMICS

Structured Allocation

300,000,000 FURA — FIXED SUPPLY

Founders 55% ~165,000,000 FURA

Core founders structured allocation derived from primary holdings

Multisig Reserve (2-of-3) 20% ~60,000,000 FURA

Secured reserve under multi-signature control for long-term stability

Market / Liquidity 15% ~45,000,000 FURA

Allocated for liquidity provisioning across decentralized and future centralized exchanges

Marketing / Growth 5% ~15,000,000 FURA

Community expansion, partnerships, and user acquisition

Ecosystem / Emerald Report 5% ~15,000,000 FURA

Development of the Emerald Report platform and data infrastructure

ESTIMATED CIRCULATING SUPPLY

~55M–56M FURA (external holders)

Contract: 0xe16133cd4895a23114e9d26e7682196c22b3ab86

VESTING & CONTROL

- Multisig funds secured under 2-of-3 signature approval
- Controlled and gradual deployment of allocations
- No uncontrolled or automatic token release

LIQUIDITY STRATEGY

- Initial liquidity deployed in a controlled manner
- Designed to protect price stability
- Additional liquidity added based on conditions

Execution Plan

PHASE 1

Liquidity Strengthening

- Liquidity Pool Optimization
- Institutional Access Setup
- Trading Environment Stabilization

PHASE 2

Market Expansion

- Regional Emerald Data Integration
- Strategic Trading Partnerships
- Market Intelligence Scaling

PHASE 3

Exchange Visibility

- CEX Listing Pipeline
- Global Market Accessibility
- Institutional Token Utility Integration

PHASE 4

Data Integration Growth

- AI-Driven Price Modeling
- Full Data Infrastructure Deployment
- Global Benchmark Development
